Description

It would be useful if validators could add custom data to errors which can be used to give additional hints to the user.

This could for example be the specific article name and amount missing until its minimum order amount is fulfilled. Error messages outputted in the form then could use this additional data to be as specific as possible.

History

- Status changed from New to Needs Feedback

Hi,

was this issue fixed or does it still exists?

Yes, this issue still exists as there was no change in this regard.

#3 - 2014-10-01 09:35 - Alexander Opitz

- Project changed from Extbase MVC Framework to TYPO3 Core

- Category changed from Extbase: Validation to Extbase

- Status changed from Needs Feedback to New

#4 - 2017-06-13 09:55 - Mathias Brodala

- Status changed from New to Closed

Personally I haven't needed this for a while.
