

## TYPO3.Flow - Bug #52068

### ArrayConverter should accept empty strings

2013-09-17 11:50 - Christian EBI

<b>Target version:</b>	<b>Complexity:</b>
<b>PHP Version:</b>	
<b>Has patch:</b> Yes	

**Description**

Imagine a select-box like this:

```
<label for="categories">Categories:</label>
<select name="content[categories][]" multiple="TRUE" id="categories">
  <option value="0">Category 1</option>
  <option value="1">Category 2</option>
  <option value="2">Category 3</option>
</select>
```

with this array-property:

```
/**
 * @var array
 */
protected $categories;
```

The select box allows multiple selected categories and none is selected by default.

If you submit the form without selecting any category, the PropertyMapper throws the exception:

```
No converter found which can be used to convert from "string" to "array".
```

The property mapper treats the empty values of the categories-select as string.  
Shouldn't in this case the ArrayConverter accept empty strings and convert them to an empty **array()**?
