Description

Since Extbase moved to use the TYPO3 Database API it's possible to add even more content/record security as focus can be put at one single entry point to the database.

This change introduces two new hooks (four, including the once for DBAL) before and after the general sql_query (used by Extbase).

From here you get the created query and the parent DatabaseConnection object. From here you can ex. check whether or not access should be granted to records fetched.

History

#1 - 2013-09-17 16:00 - Gerrit Code Review

- Status changed from New to Under Review

Patch set 1 for branch **master** has been pushed to the review server.
It is available at <https://review.typo3.org/23869>

#2 - 2013-09-18 15:14 - Gerrit Code Review

Patch set 2 for branch **master** has been pushed to the review server.
It is available at <https://review.typo3.org/23869>

#3 - 2015-01-06 20:31 - Wouter Wolters

- Status changed from Under Review to New

#4 - 2015-08-07 10:52 - Susanne Moog

- Sprint Focus set to PRC

#5 - 2015-11-27 18:55 - Morton Jonuschat

- Status changed from New to Rejected

Won't have this time. The patch has been abandoned on Gerrit more than two years ago and there has been no interest in this since then.

#6 - 2020-03-24 17:52 - Benni Mack

- Sprint Focus changed from PRC to Needs Decision
