Description	
<p>If you want to use an inline field (1:1 relation) as label for your TCA table the UID of related record is shown as value, but it is expected to use the TCA label from the related table.</p> <p>Reason why this is not shown: TYPO3\CMS\Backend\Utility\BackendUtility::getProcessedValue() is used to get value that is used for the TCA label.</p> <p>This one contains a switch which handles some field types differently, for example selects with foreign_table or group fields from internal_type db.</p> <p>Suggested solution: There is simply missing a case for fields of type:inline. Just handle it like value is processed for fields of type select.</p>

Revision 807b5919 - 2013-09-19 14:45 - Claus Due

[BUGFIX] Display relations' titles when TCA label field is type inline

This change adds a case to treat "inline" TCA types the same way "select" is treated when building the record's label value.

Before, if record used field of type "inline" as TCA label field, TYPO3 would display fx "3" (number of related records as stored in field on parent record).

After, TYPO3 will display fx "Record1, Record2, Record2" if "inline" field contains three related records named thusly.

Fixes: #52133

Releases: 6.2, 6.1, 6.0, 4.7, 4.5

This fix is incomplete.

To handle TCA type inline, some more lines of code are needed.

Please see Ticket [#22970](#) - Patch is submitted to gerrit since 9 month
