#### Description

When using the form wizard to edit a form containing fields with multiple values such as radio buttons or selects, newlines are inserted after saving the form.

Example radio buttons before using the wizard:

```
Question | *Question=radio | Yes, No
```

After saving form using the wizard:

```
Question | *Question=radio | Yes,  
No
```

This issue doesn't occur using TYPO3 4.5.x and to clarify: we're using the old form extension, not the new one. I've added a screenshot to show how this looks front end.

Hi Wouter,

are you talking about the "old" Form Wizard or the new, ExtJS-based Drag & Drop Wizard?

##### #2 - 2015-01-19 09:44 - Wouter Beeftink

Hi Mathias,

Yes, I meant the old one. I haven't tested this in 6.2 since we've moved over to Powermail.

##### #3 - 2015-01-19 09:46 - Mathias Schreiber

- Status changed from Needs Feedback to Closed

ok, thanks for the feedback and apologies the ticket got stuck so long.

We won't be supporting the old wizard any longer, thus I'm closing down the ticket.
