

TYPO3.Surf - Bug #52273

Passwords containing a % should throw an Error

2013-09-25 17:54 - Thomas Allmer

Status: Accepted	Start date: 2013-09-25
Priority: Should have	Due date:
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	
Description If you password contains a "%" the expect command won't work as the passwords "%" will be used by the printf... pretty hard to catch so a password check would avoid frustrating moments... like the one I just had... if you point me to the correct place where to implement this I could certainly do this.

I guess you should not throw an exception here, but instead mask the % for printf by doubling it.

#2 - 2016-01-17 17:11 - Helmut Hummel
