Revision 690a3713 - 2013-09-26 21:42 - Christian Kuhn

[BUGFIX] Configure main extbase caches for unlimited entry lifetime

The extbase reflection and object caches are "stable" cache entries
and only need to be deleted if extensions change or are updates. The
extension manager takes care of flushing in this case.
Currently, the default lifetime of those cache entries is only one
hour, so they are recalculated pretty often. This is especially a
problem if the site was not accessed for more than an hour, since
tons of cache entries exceeded their lifetime and require
recalculation.
The patch moves the cache configuration of the required extbase
extension to DefaultConfiguration and sets unlimited default
lifetime for object and reflection cache.
