

TYPO3.Fluid - Bug #52419

Wrong PHPDocs notation for default value inline f:translate viewhelper

2013-10-01 09:03 - Frans Saris

Status:	New	Start date:	2013-10-01
Priority:	Should have	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	2.0		
Has patch:	No		

Description

The inline documentation in TYPO3\Fluid\ViewHelpers\TranslateViewHelper states:

```
{f:translate(id: 'some.label.id', default: 'fallback result')}
```

But this has to be:

```
{f:translate(id: 'some.label.id', value: 'fallback result')}
```

History
