

TYPO3 Core - Bug #52470

In Chrome RTE inserts weird SPAN tags

2013-10-02 14:26 - Stephan Vidar

Description			
If the bulleted list is applied to simple text, HTML code looks like this:			
<pre>Lorem ipsum...</pre>			
The phenomenon occurs in Chrome 30 and Opera 16. These browsers use the same rendering engine. Maybe this is the reason?			
TYPO3 4.5.30

History

#1 - 2014-01-31 01:08 - Tobias Wollender

I have a similar behaviour in Chrome and the RTE (TYPO3 6.2) when using RTE.default.contentCSS and some definitions for the body in the external file. E. g. something like this:

```
body {  
background: #efeedf !important;  
color: #333 !important;  
font-family: Arial, sans-serif;  
font-size: 15px !important;  
}
```

If i copy and paste some text - from the RTE to the RTE - I get tags with font-size definitions applied to the pasted text. And it also happens if I try to make normal text out of an unordered list. If I delete the body css part from the external css file, everything works fine.

#2 - 2014-02-07 11:40 - Sascha Löffler

As a workaround add this to your pageTSConfig:

```
RTE.default.proc {  
    entryHTMLparser_db {
```

```
tags {
  span.fixAttrib.style.unset = 1
  span.rmTagIfNoAttrib = 1
}
}
```

#3 - 2014-03-07 14:03 - Urs Braem

I can confirm this in Chrome 33, `` is added - with TYPO3 6.1

#4 - 2014-03-07 14:32 - Urs Braem

- Target version set to 6.2.0

As this affects 6.x too, the version might be updated

#5 - 2014-08-14 10:39 - Falk no-lastname-given

This issue is still present in Chrome 36 with TYPO3 6.2.4!

Chrome is a very popular browser and many of our clients using chrome so this issue should be solved.

- Status changed from Under Review to New

Please test this change: <https://review.typo3.org/#/c/33392/> and report in which browser you tested.

While this should fix the case of the list insertion, I was not able to reproduce the problem on paste.

Please explain the type of paste operation being performed: plain text or other.

#9 - 2014-10-20 09:26 - Stephan Vidar

I have tested this change: <https://review.typo3.org/#/c/33392/> and the problem with list insertion is solved! I also could not reproduce the problem on paste.

Browser: Chrome 38 (Win)
TYPO3 6.2.5
