Description

All I see in the FE is "Sorry, the requested view was not found.

The technical reason is: No template was found. View could not be resolved for action "list".

Whether or not I use TS or add as a CE.

I also can't select the plugin in the plugin selector. It says there is a type mismatch in fields in the database. According to the EM nothing in the database needs updating.

Ext author provided a new version, ready für TYPO3 CMS 6.2.

Maybe this helps out.
