Description

I have downloaded a t3x file from TYPO3 4.7 and imported it in current GIT-Version (30.10.2013). This results in following error:

Extension Upload failed

Package "jw_api" is not available. Please check if the package exists and that the package key is correct (package keys are case sensitive).

I can see my ext in typo3conf/ext, but it was not listed in Extension Manager. I have removed this directory and tried again, because I have to copy the error message for this issue. After reloading the Extension Manager it results in this Errormessage:

```
exec_INSERTquery
caller TYPO3\CMS\Core\Database\DatabaseConnection::exec_INSERTquery

- Status changed from New to Needs Feedback
- Assignee set to Nicole Cordes

Does the extension you tried to import depends on `jwt_api`? I couldn't find it in TER so this might be the problem

#2 - 2014-02-01 10:14 - Stefan Froemken

no no no...much simpler. Goto typo3.org -> download an extension like formhandler -> go to extension manager -> upload formhandler -> and you get the message.

#3 - 2014-06-02 17:06 - Alexander Opitz

- Target version deleted (6.2.0)

So do you have an extension installed, which depends on `jwt_api`?

#4 - 2014-10-06 09:51 - Alexander Opitz

- Status changed from Needs Feedback to Closed
