

TYPO3 Core - Bug #53227

Page Copy with Content Elements (Preview-Pics don't appear)

2013-10-30 14:41 - Manuel Thaler

Description

When copying a page in pagetree (either pagetree with context-menu or in list-view with the common copy-feature) following happens:

- page is beeing copied
- page contents are copied as well

when inspecting the result after copying the page, we realized the preview pictures in the created page copy are not shown.

as soon as we open a content element for editing (i.E. textpic) and save & close it, the thumb is beeing displayed of the image-element in the content.

do you have any idea why this doesn't show the preview-pics?

Thank you for having a look at this.

in fact: tt_content (textpic) preview doesn't show thumb (in preview) after copying a page.

History

#1 - 2014-01-20 14:33 - Alexander Opitz

- Project changed from 1250 to TYPO3 Core
- Category deleted (Misc)

#2 - 2014-01-20 14:34 - Alexander Opitz

- Category set to Backend User Interface
- Status changed from New to Needs Feedback
- Assignee deleted (Ben van 't Ende)
- Priority changed from Must have to Should have
- Is Regression set to No
- TYPO3 Version set to 6.0

Hi Manuel,

which TYPO3 version did you use?
