#### Description

As many others, I took the opportunity to do a clean move of the page data from 4.5 LTS to a 6.2 beta.

Importing of 4.\* t3d forks so far, except if file are attached (an image in my usecase).

I get the following error:

#1300086584: uid of fileusage (sys\_file\_reference) has to be numeric. (More information)

InvalidArgumentException thrown in file  
/home/sten/genoveva2\_server/typo3\_src-6.2.0beta1/typo3/sysex/core/Classes/Resource/ResourceFactory.php in line 548.

The stacktrace is here:

<http://pastebin.com/Htfe1rjF>

A clean import would be a great feature, since I am surely not the only one to do imports and exports between different LTS versions.
