Description

Choosing pictures from fileadmin for textpic the path in Backend is created wrong and thumbnails are not found. All links are prepended with typo3/ :

example: www.domain.com/typo3/fileadmin/_processed_/preview_BW_001_679e9419b3.jpg

In FE the files are shown and processed correctly, the correct path from the example is:

example: www.domain.com/fileadmin/_processed_/preview_BW_001_679e9419b3.jpg

Hello,

Choosing pictures from fileadmin for textpic the path in Backend is created wrong and thumbnails are not found. All links are prepended with typo3/ :

example: www.domain.com/typo3/fileadmin/_processed_/preview_BW_001_679e9419b3.jpg

In FE the files are shown and processed correctly, the correct path from the example is:

example: www.domain.com/fileadmin/_processed_/preview_BW_001_679e9419b3.jpg

I have a similar (or the same) issue: my file paths in fileadmin are all relative and thus don't work; on another installation the path is generated correctly with "../" in front.

#2 - 2013-12-07 04:49 - David Bruchmann

after changing the default path for fileadmin ("fileadmin/") to "/fileadmin/" the pictures in backend are shown (still with the option "relative path"). I haven't yet verified if this setting is working when TYPO3 is installed in a sub-directory but with the available options I suppose the settings always can be adjusted somehow.

For the moment the problem seems being solved for me and the issue can be closed.
