| Description | | | |
| Currently the link checkers to not have access to the active TSConfig. | | | |
| This could be handy to allow additional configuration options for the different link types. | | | |
| I'll open another issue so that it will become clear for what this can be used. | | | |

[FEATURE] Provide TSConfig to link checkers

The currently active TSConfig for the linkvalidator is passed to the LinkAnalyser instance which makes it publicly available for the link checkers.

IMHO a validator can fetch the TSconfig himself based on the provided pid. Or is there a reason why we need the TSconfig from the current page where the check run is initiated?

#5 - 2013-12-21 19:52 - Alexander Stehlik

Hi Philipp,

thank you for your feedback.

I see some problems with the "normal" Page TSConfig:

- it can be overwritten in the scheduler task settings, these would not be available in the Backend API
- You can set 0 as Page UID in the scheduler settings to scan the whole page tree. For PID 0 no Page TSConfig would be available.

Should I change the release to 6.3?

Cheers,
Alex

#6 - 2013-12-21 20:03 - Philipp Gampe

OK. Yes, please set the release to 6.3
