Description			
As an integrator I want to download the introduction distribution			
Option # 1			
- Put everything on git.typo3.org			
- Include it in the build process			
after talking to Ernesto - Option #2:			
- Put EXT:introduction on TER			
- Allow Install Tool to download EXT:introduction			
As an integrator I want to set a password for all users at installation time			
- Find a way to update FE user / BE user / Install Tool password during installation. Must be after the import of the t3d. Make sure the functionality can only be called once during installation time.
