

## Logging Project - Bug #55715

### BE Module for viewing the log records

2014-02-06 10:04 - Sander Leeuwesteijn

<b>TYPO3 Version:</b>	6.2		

#### Description

I'm surprised none of the features mention a BE module in which we can view the log records, search through them, sort them, filter, etc.

The manual states it as missing, but i think it's kind of a critical feature for when database logging is used.

#### History

##### #1 - 2014-02-06 10:10 - Sander Leeuwesteijn

I just noticed: <http://forge.typo3.org/projects/extension-log/>

But it's empty.

##### #2 - 2014-03-15 02:49 - Steffen Müller

It is mentioned in the project description in the chapter "What's missing":

"Enhance the usability of the BE log module"

Indeed, usability is far from a precise term for this.

I am sorry but I can't provide a backend log module by myself. If you like to to push the TYPO3 project forward, please provide patches to make the BE log module compatible.

You could ask Ingo Renner irnrr for the @log extension key if you feel like contributing a new log backend module.
