

## Google Maps API Extbase - Bug #55728

### jQuery(...).gomapsex is not function

2014-02-06 13:34 - Michael Möhwald

<b>Status:</b>	Closed	<b>Start date:</b>	2014-02-06
<b>Priority:</b>	Should have	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Spent time:</b>	0.00 hour
<b>Description</b>			
The following error message I get in the frontend (firebug console), after I installed the extension, as in the tutorial:			
<pre>TypeError: jQuery(...).gomapsex is not a function jQuery("#Partner").gomapsex(gme);</pre>			
In the backend the extension works without problems.

Hi,

thanks for your interest on go\_maps\_ext.

Is the JS from the Extension correct included?

First include JQuery on the page then the gomapsex.js.

May you didn't have include the TypoScript from the extension.

Could you fix it?

Hi,

i only include the 'go\_maps\_ext' in my Default Root Template.

Should i include the JQuery and the gomapsex.js manually?

#### #4 - 2014-02-07 11:44 - Marc Hirdes

Hi, no you don't have to include the jquery.gomapsex.js from the extension manually.

Of course you have to be sure that jquery is included. You can do this manually or you can configure in the extension manager to include jquery from the extension.

Hi, I have the same problem after update from typo3 6.1.7 up to 6.2.3. Is this issue still under review or has someone else any news about it?

#### #6 - 2014-06-04 17:09 - Wolfgang Spitz

I could solve the problem for our project. We've included the JS files in the footer of the body and it worked fine as before.

Hi

I have the same problem after updating from Typo3 4.5 to 6.2.

I have not been able to get my map to show again.

The error i got is Uncaught TypeError: undefined is not a function "jQuery("#hal").gomapsex(gme);"

**#8 - 2015-06-09 13:49 - Marc Willmann**

I ran in the same issue; solved it by editing my OWN jquery-based JavaScript (substituted `$(...)` by `jQuery(...)`). I'm not sure if the extension code is really correct, but it may be handled by not changing the extension code.
