[TASK] Add framework for frontend rendering functional tests

To ensure that actions in the backend have an accordant and correct impact in the frontend, a frontend request needs to be triggered from the functional test execution.  
The response of that simulated frontend request shall be delivered as JSON, exceptions need to be caught and forwarded to the test suite as well. Besides that, it is required to have a possibility to set up TypoScript configuration, modify TCA and TYPO3\_CONF\_VARS for further hook processing.

Resolves: #55882

Releases: 6.2
