Description

Although the suhosin module is disabled via "suhosin.simulation = on", the TYPO3 Install Tool system environment check reports the following:

```
PHP suhosin.get.max_value_length not high enough
suhosin.get.max_value_length=512. This setting can lead to lost information if submitting big forms in TYPO3 CMS like it is done in the install tool. It is heavily recommended to raise this to at least 2000
```

Similarly, the Reports-Module in the TYPO3-Backend will report a failed test and if the Scheduler is configured to send report e-mails it will send an e-mail reporting the (non-existing) issue.

Revision 38fa90a1 - 2014-09-23 18:11 - Wouter Wolters

[BUGFIX] Suhosin triggers warnings in Install Tool

When Suhosin runs in simulation mode, violations are logged as usual, but nothing is blocked or removed from the request.

Add an extra check to isSuhosinLoaded, to prevent unneeded warnings.

Resolves: #55886

Releases: master, 6.2
