Description

See the screenshots which explain the best.

Changing the padding-top from 25px to 21px the first active entry "page" would be in sync with the tree

Good! Let us rather remove padding/margin of group / DIV since padding above modgroup list is equal to height of docheader functions row.

The screenshot displays the TYPO3 Core Backend User Interface. The top navigation bar includes the TYPO3 logo, the user name 'Felix Kopp', and a 'Logout' button. Below the navigation bar, there are several tabs: 'WEB', 'FILE', 'USER TOOLS', and 'ADMIN TOOLS'. The 'FILE' tab is active, showing a file list with 'Filelist' and 'Sphinx Console'. The 'USER TOOLS' tab shows 'Task center' and 'User settings'. The 'ADMIN TOOLS' tab shows 'Extension Manager', 'Language', 'Indexing', 'Styleguide', 'Inline', and 'ExtDevEval'. The main content area is divided into two columns. The left column contains a navigation tree with the following structure: 'Welcome to TYPO3' (expanded), 'Main-Navigation' (expanded), 'Backend-Layout', 'id=64 ts' (highlighted), 'Faceted Search', 'About the team' (expanded), 'Dragged', 'Also D+D', 'Access-Test', 'All CE2', 'Content from #16', 'Level 1', 'Meta-Navigation' (expanded), 'Shortcut', and another 'Shortcut'. The right column displays a 'Welcome to TYI' message and a 'Left' sidebar with a '+ ' icon.
