Description

The condition should check for comma in \$value in the method listQuery. This will not work because the parameters of strpos are in wrong order.

It need to be:

```
strpos($haystack, $needle)
```

but we have:

```
strpos($needle, $haystack)
```

```
if (strpos(',', $value) !== FALSE) {  
    throw new \InvalidArgumentException('$value must not contain a comma (,) in $this->listQuery()  
    !', 1294585862);  
}
```
