<b>Description</b>			
Check what this could be helpful for and remove that methods as well as the in memory map for that.			

### History

#### #1 - 2014-03-04 14:53 - Thomas Maroschik

getAliasForClassName is wrong, because there can be multiple aliases for a single class. getAliasesForClassName has been introduced to tackle this and getAliasForClassName is deprecated.

#### #2 - 2014-12-31 22:47 - Benni Mack

- Status changed from New to Closed

this is tackled. getAliasForClass is removed with CMS7.
