[TASK] Prevent Inclusion of MediaWizardProvider\* in Base Bootstrap

On every Frontend request, the original media wizard provider of EXT:cms is loaded, by fetching the MediaWizardProviderManager and then an object of MediaWizardProvider is loaded and held in memory, as this is not needed, but only on pages where a media is used.

This change moves the instantiation of the providers to the time when it is needed.

Further modification would be to add the registered wizards to TYPO3\_CONF\_VARS[FE][mediaProviders] and use them directly in the MEDIA object, so the MediaWizardProviderManager class could be deprecated.

Releases: 6.3

Resolves: #56336
