Description
When I try to view a content translated in another language than default language from Backend in list module I see only content in default language.

steps to reproduce in module list:
create a content in default language
add a translation of this content
on the content translated, do a right click then select "Show"
you will see only the content in default language

I have tried on 2 differents websites and problem is the same.

Tested on Typo3 version 4.5.32

Revision f3faea34 - 2019-10-08 15:00 - Christian Eßl

[BUGFIX] Fix "Show" link in the context menu of page translations

In the list module, when opening the context menu of a "Page Translation" record, a "Show" link will be shown, which is supposed to open the page in the frontend with the correct language. However this link was broken, because the PageProvider class didn't respect page translations at all.

History

#1 - 2014-06-27 17:33 - Markus Klein
If this still exists on 6.2 we need to ensure the link appends the target L parameter correctly.

#2 - 2015-07-17 11:23 - Riccardo De Contardi
still present in 6.2.14 and 7 (latest master)

#3 - 2017-02-22 22:25 - Riccardo De Contardi
Still affects 8.7-dev (latest master); it works correctly on Info > localization overview.

#4 - 2017-02-24 00:29 - Markus Klein
This problem is only present in the Click Menu of a content element.

On 7.6 the problem is that \TYPO3\CMS\Backend\ClickMenu\ClickMenu::printDBClickMenu() does not pass a language information to \TYPO3\CMS\Backend\ClickMenu\ClickMenu::DB_view() (which does not even have a parameter for this purpose).

The code in master has been fully rewritten, so this needs an extra check.

#5 - 2017-09-03 22:08 - Riccardo De Contardi
Still present on latest 9.0.0-dev (master); also affects the "View webpage" button in the page toolbar

#6 - 2018-10-25 11:45 - Susanne Moog
- Sprint Focus set to On Location Sprint

#7 - 2018-10-26 11:51 - Jasmina Ließmann
I can confirm this issue on the current master (9.5.1-dev).

#8 - 2018-10-28 11:38 - Susanne Moog
- Status changed from New to Needs Feedback

I cannot reproduce the issue on 9.5 - can you add new steps to reproduce?
I tested the following:

- Web > Page - Translated Content > Show in ClickMenu
- Web > List - Translated Page > Show via Icon
- Web > List - Translated Page > Show via ClickMenu
- Web > List - Translated Content > Show via Icon
- Web > List - Translated Content > Show via ClickMenu

With site configuration all tests use the correct language prefix (in my case /de/).
Without site configuration all tests add the L param (in my case L=4).

#9 - 2019-01-28 23:09 - Riccardo De Contardi
@Susanne Moog I tried with both 8.7.24 and 9.5.4; everything works fine Except:

- TYPO3 9.5.4
- List view > table "page translation" > right click on the icon of the translated page > show

Result:
Whoops, looks like something went wrong.

(1/1) #1518472189 TYPO3\CMS\Core\Error\Http\PageNotFoundException
The requested page does not exist

the problem is that the page that TYPO3 is trying to access is https://typo3.9.test.it:8890/eng-test (wrong) instead of the correct https://typo3.9.test.it:8890/en/eng-test it misses the /en/ part of the URL.

Can someone confirm? Should I open a new issue for that? Thank you

the problem is that the page that TYPO3 is trying to access is https://typo3.9.test.it:8890/eng-test (wrong) instead of the correct https://typo3.9.test.it:8890/en/eng-test it misses the /en/ part of the URL.

Yes, I can confirm that. All the other "view" buttons I could find are calling the URL with the correct language prefix, but this right-click menu omits it.
