Description Hello Core-Team, since years it is not possible to easily add/modify Marker-Array in fe_login. For now you have to XCLASS Plugin or work with ObjectMapper in TYPO3 6.0 to modify this class on your own. I think a new hook would be much better. Stefan

History

#1 - 2014-03-07 12:07 - Georg Ringer

there is only the \$GLOBALS['TYPO3_CONF_VARS']['EXTCONF']['felogin']['postProcContent'] so xclass is not needed but certainly this ext should be moved to fluid instead sticking to pibase and the limited features

#2 - 2014-03-21 09:24 - Eric Chavillaz

It would be a real breakthrough to move this ext to Fluid, +1!

Hey Stefan,

wanna take up this one? Haven't really seen you around lately.
