

TYPO3 Core - Bug #57129

Related group db record title does not resolve correctly

2014-03-21 09:03 - Helge Funk

Status:	Closed	Start date:	2014-03-21

Description

If a record has a group db field and enforces displaying this field with label_alt and label_alt_force as a comma separated list in the record title, only the value (record count) from the local field will be used as the uid of the related record and not the uid of the related record. This behaviour appears only in the record list view, not in the edit record view.

Extension to verify and bugfix will follow.

Revision aa49f0d6 - 2015-04-13 11:08 - Georg Ringer

[BUGFIX] Fix readable output for type "group" and MM-tables

If a TCA field uses the type "group" and a MM-table, a wrong value is displayed in the list view. This is due to missing support for MM-tables for type "group". Only the type "select" has an implementation.

This patch adds the implementation for the group field.
