Description			
Updating an extension that is needed by another extension fails, because the extensions cannot be disabled temporarily during extension update.			
This issue exists since 6.0.			
Workaround: Disable all depending extensions beforehand.

[BUGFIX] Extension update fails if needed by other extensions

On update process the extension which should be updated gets uninstalled. This doesn't work if the extension is needed by other ones. This patch removes the unload process before the update to make sure system is working in the mean time.

Resolves: #57264

Releases: 6.2

The extension manager tries to uninstall an extension before it gets updated. I don't see any reason for that and provided a patch.
