

TYPO3 Core - Bug #57393

Task # 57578 (Closed): TceformsUpdateWizard improvements (Migrate all file relations from tt_content.image and pages.media)

Endless Loop in TceformsUpdateWizard

Description			
<p>I'm currently updating a large TYPO3 Website from 4.5 to 6.2 and have found a bug in the Upgrade Wizard. The migration with title 'Migrate all file relations from tt_content.image and pages.media' (typo3/sysex/install/Classes/Updates/TceformsUpdateWizard.php) ends up in an endless loop. The problem exists in the do/while loop starting at line 188 respectively in the getRecordsFromTable method in typo3/sysex/install/Classes/Updates/TceformsUpdateWizard.php.</p> <pre>188 do { 189 \$records = \$this->getRecordsFromTable(\$stable, \$fieldToMigrate, \$fieldsToGet, self::RECORDS_PER_QUERY); 190 foreach (\$records as \$record) { 191 \$this->migrateField(\$stable, \$record, \$fieldToMigrate, \$fieldConfiguration, \$customMessages); 192 } 193 } while (count(\$records) === self::RECORDS_PER_QUERY);</pre> <p>self::RECORDS_PER_QUERY is set to 1000. Every time a query like 'select ... LIMIT 1000' is created. Because there's no starting point defined after the LIMIT statement (which should be 0 on first loop and then += self::RECORDS_PER_QUERY) the query will always fetch the first self::RECORDS_PER_QUERY entries. Thus the while condition is always true. To fix this the LIMIT statement should have the starting point included like LIMIT <entries_fetched_so_far>, self::RECORDS_PER_QUERY.</p> <p>Please fix this asap since many people will update their TYPO3 LTS Websites shortly.</p>

[BUGFIX] Prevent infinite loop in TceformsUpdateWizard

If you have more than 1000 missing files within file relations in tt_content.image and pages.media an infinite loop pops up, because always the same records are fetched from database. This patch stores the uids of failed records for each table to prevent the infinite loop and restart processing after timeout.

Releases: 6.2

Resolves: #57393

I can confirm this Bug, also trying to update a small Installation to 6.2.0 from 4.5.32 with PHP 5.3.27. Everything else went smooth, Frontend is up and running but no Content images at all.

Upgrade Wizard throws a "Uncaught TYPO3 Exception" in Debug-Mode when trying to execute "Migrate all file relations from tt_content.image and pages.media":

PHP Warning: Invalid argument supplied for foreach() in typo3/sysext/install/Classes/Updates/TceformsUpdateWizard.php line 190.

#2 - 2014-04-02 17:36 - Markus Klein

- Status changed from New to Needs Feedback

- Target version deleted (next-patchlevel)

These are two different issues.

The issue reported here is IMO not an issue. The limit is ok, you can always start from 0, because the select query only looks at records not yet migrated!

Regarding the foreach() thing. There seems to be a DB issue, the select seems to fail.

I'll create a new ticket for this, which introduces a better check and issues an exception with the SQL error.

#3 - 2014-04-02 19:06 - Markus Klein

The new ticket for the foreach() issue is [#57572](#)

I can confirm this Bug, too. In our case the Problem was that we have a lot of pictures in tt_content, which no longer exist and the script don't set the image field to 1 or delete the entries.

So in the foreach() there are still the same 1000 entries (infinityloop).

We fix that problem by increasing the value self::RECORDS_PER_QUERY to the number of entries from tt_content.

- Status changed from Needs Feedback to New

#7 - 2014-11-18 09:44 - Sebastian Helzle

We also had this issue today with a big site (~15000 pages) and more than 1000 missing media files in the page properties because we tried the upgrade on a lightweight copy without the assets.

It seems,once click Execute, i never see this "Migrate all file relations from tt_content.image and pages.media" upgrade wizard.

I have around 10000+ records.

I re-imported the db, but still i could not see the wizard again. can you please let me know if i doing something wrong?

#16 - 2015-02-27 16:07 - shanmugarajan k

i just saw in the LocalConfiguration.php

'INSTALL' => array() having the 'wizardDone' wizard is entered. Hence its not visible again.

so it seems, this is added as soon as first run completed.

#17 - 2015-02-27 19:25 - Markus Klein

@shanmugarajan

Which TYPO3 version are you upgrading from?
Are you sure you actually need this patch?

It can well be that the wizard manages to complete the migration in one go, so it won't show up again.

#18 - 2015-02-27 23:27 - shanmugarajan k

Hello Markus,

Yes. i upgrading from 4.5 to 6.2.

Yes. needed. thanks.
