

Apache Tika for TYPO3 - Bug #57596

Tika not compatible with TYPO3 6.2

2014-04-03 13:07 - Matthias Nitsch

Description

Tika seems not compatible with TYPO3 6.2. The Install Tool recognizes it as incompatible extension and it also doesn't show up in the reports module as known from 6.1

Call to a member function `exec_SELECTgetRows()` on a non-object in
`/Users/mnitsch/Projects/TYPO3CMS/solr/typo3_src-6.2.0/typo3/sysext/core/Classes/Registry.php` on line 137

Are there plans to get 6.2 compatibly soon?

History

#1 - 2014-04-15 18:55 - Ingo Renner

This refers to a class in the core, how is this related to Tika? Can you provide more information please, f.e. a complete stack trace?

#2 - 2014-04-15 19:01 - Ingo Renner

- Target version set to 2.0

#3 - 2014-04-15 21:57 - Peter Kraume

This is just the output of the check in the install tool of TYPO3 6.2. Unfortunately there is no more output.

I've installed the smooth migration extension (EXT:smoothmigration) in a TYPO3 4.5 installation to test if there are checks that will fail for EXT:tika but it seems to be ok.

I have the same issue if I want to use the image tests in the install Tool.
I get the attached Error Message.

The Check for broken extensions states that tika is not compatible.
After (for testing) removing these lines from `ext_tables.php` the check shows no error anymore:
`$registry = t3lib_div::makeInstance('t3lib_Registry');`
`$servicesAvailable = $registry->get('tx_tika', 'available', FALSE);`

Anyhow, the image test is still not executed due to the "Detected Fatal Error" (with green "All local extensions can be loaded!" message below), so I guess this might in fact not really be related to tika.

#5 - 2015-10-07 13:55 - Ingo Renner

- Status changed from New to Closed

- TYPO3 Version set to 6.2

- Has patch set to No

Acknowledged, this is an issue with EXT:tika 1.x and TYPO3 6.2.

Please try EXT:tika 2.0 master from <https://github.com/TYPO3-Solr/ext-tika> where we don't use the registry in that way anymore.
