

TYPO3 Core - Bug #58474

Invalid dependency is not hinted to the developer

2014-05-04 10:44 - Philipp Gampe

Description			
Consider this:			
<pre>'depends' => array('cms' => '', 'div2007' => '1.1.5-', ... </pre>			
The dependency resolution will fail with Could not resolve dependency for "div2007". There should be a more descriptive error message that directly tells the user what is wrong.

History

#1 - 2014-06-21 14:18 - Susanne Moog

- Status changed from New to Needs Feedback

With what extension did you have that error and was it while trying to download from TER?

#2 - 2014-06-21 15:57 - Franz Holzinger

This happens when downloading an extension from TER using the Extension Manager. This extension is dependent on the extension div2007 .

Download tt_products 2.7.8 to reproduce this error.

#3 - 2014-07-10 17:11 - Alexander Opitz

- Status changed from Needs Feedback to New

#4 - 2015-01-09 12:02 - Mathias Schreiber

- Status changed from New to Closed

Taken into account in [#63909](#).

The issues are not linked on purpose, so the refactoring ticket does not get bloated with relations.
