

TYPO3 Flow Base Distribution - Suggestion #59019

Add marker for lazyloaded properties to \TYPO3\Flow\var_dump

Description			
Hi,			
it would be good, if you could see a lazy loaded property when you use \TYPO3\Flow\var_dump. It would be even better, if it would just automatically load those properties. See Carsten Bleicker's Email from today in the mailing list. It can cause some confusion.
