

## TYPO3 Core - Bug #59055

### Import from .t3d failed on Windows 7 with a lot of messages

2014-05-23 12:46 - Tobias Klepp

#### Description

I create a simple small page tree and exported this page tree as an \*.t3d and a \*.xml file. This step runs fine. But always a PHP warning displayed.

```
PHP Warning: sha1_file(C:/Daten/arbeit/www/typo3_62/): failed to open stream: No such file or directory in C:\Daten\arbeit\www\typo3_62\typo3\sysex\core\Classes\Resource\Driver\LocalDriver.php line 636
```

If I try to import this \*.t3d file in the same TYPO3, I see the complete page tree in the preview. But if I try to import it, the import failed and some messages created like

```
0 Possible error: pages:148 had no new id assigned to it. This indicates that the record was not added to database during import. Please check changelog!
1 Possible error: sys_domain:3 had no new id assigned to it. This indicates that the record was not added to database during import. Please check changelog!
2 Possible error: tt_content:125 had no new id assigned to it. This indicates that the record was not added to database during import. Please check changelog!
3 Error: this records is NOT created it seems! (pages:148)
4 Error: this records is NOT created it seems! (sys_domain:3)
5 Error: this records is NOT created it seems! (tt_content:125)
6 Error: this records is NOT created it seems! (pages:148)
7 Error: this records is NOT created it seems! (sys_domain:3)
8 Error: this records is NOT created it seems! (tt_content:125)
```

The same happens with the \*.xml import.

```
0 Possible error: pages:148 had no new id assigned to it. This indicates that the record was not added to database during import. Please check changelog!
1 Possible error: sys_domain:3 had no new id assigned to it. This indicates that the record was not added to database during import. Please check changelog!
2 Possible error: tt_content:125 had no new id assigned to it. This indicates that the record was not added to database during import. Please check changelog!
3 Error: this records is NOT created it seems! (pages:148)
4 Error: this records is NOT created it seems! (sys_domain:3)
5 Error: this records is NOT created it seems! (tt_content:125)
6 Error: this records is NOT created it seems! (pages:148)
7 Error: this records is NOT created it seems! (sys_domain:3)
8 Error: this records is NOT created it seems! (tt_content:125)
```

### Revision fa817a7e - 2014-10-15 23:17 - Tymoteusz Motylewski

[BUGFIX] Add more entropy to uniqid

uniqid() generates values based on current time, subsequent calls may return the same value on a fast machine.

On Windows it's even worse, as uniqid() has single-second-resolution out of the box.

Right now it is used in many places in the core, also for creating temporary identifiers for newly created records (in the datahandler).

The solution is to add a second parameter to all calls (which adds more entropy). see <http://php.net/manual/en/function.uniqid.php>

To make code consistent, this change adds the second parameter to all occurrences of uniqid.

## History

---

### #1 - 2014-05-25 16:00 - Markus Klein

- Assignee set to Marc Bastian Heinrichs

### #2 - 2014-06-20 17:11 - Marc Bastian Heinrichs

- Status changed from New to Accepted

Problem is related to [#59701](#).

When I change `uniqid('NEW');` to `uniqid('NEW', TRUE);` in class `ImportExport` the functional tests aren't failing and I assume introduction extension is imported correctly (no errors in `typo3.log`).
