Description	
The Filelinks CE offers the possibility to sort the files selected. It should also offer a possibility to define the sorting direction.

Do you mean only the direction or also the field to use for sorting? (title says something different than text of the ticket)

Ah, sorry, didn't want to bring in this concern as well.

This ticket is about the direction. I thought that also some FAL fields should be selectable for sorting, but then thought that this may lead to problems if a field like title is not set. What is your opinion?

Well i guess if a title is empty the usual thing happens... random order for these items
