#### Description

The styling of the sys\_action "Create Backend User" is not very user-friendly. Especially if you're dealing with a lot of categories, selecting them is a pain because the height of the selector is only 4 items:

#### Backend-Benutzer verwalten

Erlaubt das Anlegen neuer Backend-Benutzer.

Damit das Login per AAI funktioniert, muss der Benutzername =  
Es ist ein zufälliges, möglichst langes Kennwort zu generieren, d

This should be improved; at the same time the fields should be enlarged and old icons (delete) should be replaced.

BTW, we should also change the naming of the action type. It is "Create Backend User", but the module allows Creating, editing and deleting. "Manage Backend Users" would be better.

Steps to reproduce (for those who never used the taskcenter):

1. Add a new user that will be a template for users created through the task center (no special settings)
2. Make sure you have at least one user group
3. On the root page of your installation, add a new "Action" of type "Create Backend User"
4. Give the action a meaningful name, select the "template user" and select the "groups which may be assigned" by the action
5. Save it and go to the "task center"
