

TYPO3 Core - Bug #59559

White space before list in RTE after saving

2014-06-13 16:54 - Wouter Beefink

Description

When I insert a list in the RTE and save the page, an empty paragraph is inserted before the list. Obviously, that shouldn't happen. When I remove the empty paragraph and hit save again, the paragraph doesn't reappear.

To reproduce:

- Create a content element (text will do).
- Add a few paragraphs in the RTE.
- Add a list in between the paragraphs with one or more item.
- Hit save.
- Voila, an empty paragraph should be inserted above the list.

I can reproduce this in TYPO3 6.1.7 and 6.2.2.

Strangely, I thought I could reproduce this. But I just tried again with master and could not.

Are you able to reproduce this with TYPO3 CMS 6.2.6? In what version of which browser?

#3 - 2014-11-04 00:12 - Stanislas Rolland

This is in Chrome, right?

#4 - 2014-11-04 00:46 - Stanislas Rolland

I think that this is due to the problem reported in [#62559](#).

And I think that the change that is attached to that issue does not resolve it in all cases.
