Description			
A proper representation and data aggregation of sys_file_reference is missing in the workspace module. Besides that, if image extensions are used, thumbnails could be rendered to visualize the changes.			
Tasks:			
<ul style="list-style-type: none">• label for sys_file_reference• in active workspace context, select live file reference objects (disable automated overlays)• rendering methods for file and image difference view

[TASK] Missing visual representation of sys_file_reference

File references are currently only represented by the accordant record uid which should at least be a filename. In a workspace environment the changed file references shall be visualized as thumbnails - either being removed or inserted.
