

TYPO3.Flow - Bug #6030

Router needlessly lowercases names of package, controller, action

PHP Version:			
Has patch:			

Description

Templates in Fluid need to be in a path whose parts have to be lowercased, which breaks consistency. That is caused by the Router applying strtolower() on a bunch of values in setControllerKeysAndFormat(). Furthermore some of those calls are double-whoppered, e.g. for the package key. Just check what happens in Request::setControllerPackageKey()...

Associated revisions

Revision b29cf27b - 2010-01-14 17:42 - Karsten Dambekalns

[+BUGFIX] FLOW3 (Persistence): DataMapper now typecasts values to the intended type when mapping properties. Fixes #6028.
[+BUGFIX] FLOW3 (Persistence): DateTime properties being NULL can be persisted now. Fixes #6029.
[+BUGFIX] FLOW3 (MVC): Removed some strtolower() calls in Router to enable consistently cased template folders. Fixes #6030.
