Description

Hello!

First of all thanks @Gregor Ringer for your work on feedit!

I would like to know if you actually wanted to remove the configuration option `edit_editNoPopup` in the commit referenced below? Was it because of security (CSRF or so) issues? This option only changed the behavior of the frontend editing icon-buttons so that they open the edit form in the same window and not in a popup. The affected method `editPanelLinkWrap_doWrap` would only need a little work to bring back that feature.

In some of my projects I used this option and would like to continue to.

If you do not want this option back in the core anymore I would suggest updating the documentation (I can do a pull request for that):
<http://docs.typo3.org/typo3cms/TsconfigReference/UserTsconfig/admPanel/Index.html?highlight=.edit.editNoPopup>
<http://docs.typo3.org/typo3cms/TsconfigReference/UserTsconfig/admPanel/Index.html?highlight=.forceNoPopup>

Also there is another issue related: [#43447](#)
And another (old) issue complaining about the documentation: [#23412](#)

I can't tell you the exact reason for removing it, but feel free to re-establish the feature, by pushing a patch. Thanks.

I'll make a patch and it will also target the Bug [#20845](#). Hopefully it is "good" as I am not a core connoisseur ;)

Is there anything I can do to advance on this issue? Do I need more/other reviews/reviewers?

Thanks
Paul
