Description			
As suggested by Michael Stucki, I would be grateful if the SVN repository of EXT:contagged could be moved to Git infrastructure.			
Thanks a lot in advance.

Sorry to bother you again, but something doesn't work here:

<https://forge.typo3.org/projects/extension-contagged/repository>

--> This displays the correct repository including the tags and branches

<https://git.typo3.org/TYPO3CMS/Extensions/contagged.git/shortlog/refs/heads/master>

--> The master is empty and there is no 1.7 tag, same if I check it out to my computer.

Do you know how this happens?

As we are not offering git hosting for extension anymore I would close this ticket.
