

Multi-channel contexts - Bug #62010

screensize context seems not to work

2014-10-02 17:45 - Tobias Gaertner

Status:	New	Start date:	2014-10-02

Target version:		PHP Version:	5.5
TYPO3 Version:	4.7		
Description			
TYPO3 4.7.8 contexts 0.4.1 contexts_wurfl 0.4.0 (PHP 5.5.9 on the server)			
I created a context with type "Device properties" and just put in the field "Maximum screen width (pixels)" a value (e.g. "768"). I put on a content element the context to "YES" (no other contexts set)			
The content element is never shown up, not with manipulates iPhone user-agent nor with calling the page with my Samsung Galaxy S III.			
In the backend the test with the iPhone user-agent gives me back a data-set with "display" section - so its detected right in the test.			
Other contexts are working fine like phone, tablet or getVar.
