

TYPO3.Flow - Bug #6323

Classes in the Reflection subpackage should be instantiated via the object framework

2010-02-02 17:35 - Michael Sauter

Status:	Closed	Start date:	2010-02-02
Priority:	Should have	Due date:	
Assignee:	Karsten Dambekalns	% Done:	0%
Category:	Reflection	Estimated time:	0.00 hour
Target version:	1.0 alpha 8	Complexity:	
PHP Version:			
Has patch:			
Description			
E.g. \F3\FLOW3\Reflection\ClassReflection is instantiated throughout FLOW3 with the new operator, but shouldn't.			

History

- Category set to Reflection
- Status changed from New to Closed
- Assignee set to Karsten Dambekalns
- Target version set to 1.0 alpha 8

No, this is a deliberate decision. The classes in the reflection subpackage are not subject to AOP or Persistence, nor are there any singletons. Thus new is perfectly fine and a lot faster. Plus we need Reflection very early in the bootstrap, thus we'd have an hen-egg problem.
