The current situation of the Functions module is like this:
Wizards like "Sort pages" and "Bulk-create pages" are inside
Web=>Functions=>Wizards.
The Functions module is not used at all for anything else right now.

For a cleaner interface and code structure, both wizards are moved to the Web=>Functions level directly.

This avoids having a separate dropdown in the content area, but using the already known (and default) "functions" MOD MENU.

In a further step, the "func_wizard" extension should be moved to compatibility6 with a proper note on how to migrate old "wizard" extensions to the normal top-level functions module.

[TASK] Move wizards to Web=>Functions

The current situation of the Functions module is like this:
Wizards like "Sort pages" and "Bulk-create pages" are inside
Web=>Functions=>Wizards.
The Functions module is not used at all for anything else right now.

For a cleaner interface and code structure, both wizards are moved to the Web=>Functions level directly.

This avoids having a separate dropdown in the content area, but using the already known (and default) "functions" MOD MENU.

In a further step, the "func_wizard" extension should be moved to compatibility6 with a proper note on how to migrate old "wizard" extensions to the normal top-level functions module.
