Description	
<p>One of the most common pitfalls new users have while trying to install TYPO3 on windows is that they create FIRST_INSTALL.txt file instead of just FIRST_INSTALL.</p> <p>It is caused by the fact that Windows hides file extensions by default (so users think they create FIRST_INSTALL file, but in fact it was with .txt extension).</p> <p>I think it would be a good idea to either</p> <ul style="list-style-type: none">- make the install tool also check for file with the txt extension- or ask user to create FIRST_INSTALL.txt file from the beginning

[TASK] Less strict first install file recognition

Now install tool will recognize all files which starts with FIRST_INSTALL (case insensitive) as a correct first install file.

This solves common issue beginners hit on Windows where files are saved with ".txt" extension, and the extension is hidden by default.

Resolves: #63340

Releases: master

What would be also nice, to add the link to the wiki for the "FIRST_INSTALL" notice, where we can put some screenshots and detailed instruction how to do that on different systems.

#2 - 2015-01-29 10:53 - Tymoteusz Motylewski

- Sprint Focus set to On Location Sprint

#3 - 2015-01-29 10:54 - Tymoteusz Motylewski
