<b>Description</b>			
Since EXT: indexed_search uses a classname different from what TYPO3 generates the "old" extension implementation breaks on current master. Adding a ClassAliasMap solves the problem.

[BUGFIX] Add tx\_indexedsearch as class alias again

Registering a "pibase" frontend plugin with addPtoST43(\$\_EXTKEY) generates a TypoScript snippet for indexed\_search like:

```
plugin.tx_indexedsearch = USER_INT
plugin.tx_indexedsearch.userFunc = tx_indexedsearch->main
```

The class will be instantiated and main() is called at render time. There is no easy way to change this. In case of indexed\_search, the "old" class name "tx\_indexedsearch" must be kept as alias to the namespaced class name for the time being to not trigger a "class not found" fatal error.

Fixes: #64280  
Releases: master
