Revision c1025c56 - 2015-08-06 14:28 - Andreas Allacher

[FEATURE] IRRE useCombination option to modify warning text

Add support for inline elements in combination with `['appearance']['useCombination']` to suppress the warning messages by using `['appearance']['suppressCombinationWarning']` or `['appearance']['overwriteCombinationWarningMessage']` to overwrite the default message.
(allows LLL: values)

Could you add some info to the report?
I have troubles understanding what you refer to :)

#2 - 2015-01-29 15:26 - Andreas Allacher

Sorry.
I meant if I use a TCA configuration for an inline field in combination with the appearance setting useCombination.
The foreign_selector record will that way be rendered as inline field.

However, that way I get a warning when editing the record that it is edited "globally" which makes sense in a way but might not be necessary all the time.

Furthermore, if one mainly uses it to render the foreign_selector record (it is necessary to create the intermediate table to use foreign_selector) and suppress all fields in the intermediate table then I have an empty line from not used tabs of the record of the intermediate table.

I mean the message in \TYPO3\CMS\Backend\Form\Element\InlineElement::renderCombinationTable:

```
$flashMessage = GeneralUtility::makeInstance('TYPO3\CMS\Core\Messaging\FlashMessage', $GLOBALS['LANG'])  
->sL('LLL:EXT:lang/locallang_core.xlf:warning.inline_use_combination'), '', FlashMessage::WARNING);  
$out = $flashMessage->render();
```

- Status changed from Needs Feedback to Under Review

Patch set 1 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server.
It is available at <http://review.typo3.org/36415>

#4 - 2015-01-30 13:33 - Andreas Allacher

- File *demoinline.zip* added
- File *Warning Message.png* added
- File *suppressed_warning.png* added

Demo EXT and possible solution added.

Though it might also be a good idea to not only suppress but also allow to modify the message.
