#### Description

The primitive search, which is loaded via "Search" CType contains a cObject called "SEARCHRESULTS". The search is based on a form based on FORM (old functionality already moved to compatibility6), is moved to compatibility6.

The following parts are moved:

- New Content Element Wizard
- cObject SEARCHRESULTS
- TypoScript from CSS Styled Content
- The TCA configuration

Due to the limited possibility to add a CType (select item in general) at a specific position (e.g. as first item of an item group divided with --div--), the patch also provides compatibility for EXT:felugin and EXT:form by doing TCA overrides for the CType element.

[[!]][[TASK]] Move legacy "search" CType to compatibility6

The primitive search, which is loaded via "Search" CType contains a cObject called "SEARCHRESULTS". The search is based on a form based on FORM (old functionality already moved to compatibility6), is moved to compatibility6.

The following parts are moved:

- New Content Element Wizard
- cObject SEARCHRESULTS
- TypoScript from CSS Styled Content
- The TCA configuration

Due to the limited possibility to add a CType (select item in general) at a specific position (e.g. as first item of an item group divided with --div--), the patch also provides compatibility for EXT:felugin and EXT:form by doing TCA overrides for the CType element.

This also fixes some sideeffects that came with the previous patches for "mailform".
