Hello there,

the advanced search delivers results, but what about the advanced search options? They aren't in the result, because action "search" is called and "search" doesn't have the routine to assign these options, isn't it?

Routine in action "form" - it doesn't appear in action "search", so the advanced options are gone after submit:

```
if ($search['extendedSearch']) {  
    // "Search for"  
    $allSearchTypes = $this->getAllAvailableSearchTypeOptions();  
    $this->view->assign('allSearchTypes', $allSearchTypes);  
    $allDefaultOperands = $this->getAllAvailableOperandsOptions();  
    $this->view->assign('allDefaultOperands', $allDefaultOperands);  
    $showTypeSearch = count($allSearchTypes) || count($allDefaultOperands);  
    $this->view->assign('showTypeSearch', $showTypeSearch);  
    // "Search in"  
    $allMediaTypes = $this->getAllAvailableMediaTypesOptions();  
    $this->view->assign('allMediaTypes', $allMediaTypes);  
    $allLanguageUids = $this->getAllAvailableLanguageOptions();  
    $this->view->assign('allLanguageUids', $allLanguageUids);  
    $showMediaAndLanguageSearch = count($allMediaTypes) || count($allLanguageUids);  
    $this->view->assign('showMediaAndLanguageSearch', $showMediaAndLanguageSearch);  
    // Sections  
    $allSections = $this->getAllAvailableSectionsOptions();  
    $this->view->assign('allSections', $allSections);  
    // Free Indexing Configurations  
    $allIndexConfigurations = $this->getAllAvailableIndexConfigurationsOptions();  
    $this->view->assign('allIndexConfigurations', $allIndexConfigurations);  
    // Sorting  
    $allSortOrders = $this->getAllAvailableSortOrderOptions();  
    $this->view->assign('allSortOrders', $allSortOrders);  
    $allSortDescendings = $this->getAllAvailableSortDescendingOptions();  
    $this->view->assign('allSortDescendings', $allSortDescendings);  
    $showSortOrders = count($allSortOrders) || count($allSortDescendings);  
    $this->view->assign('showSortOrders', $showSortOrders);  
    // Limits  
    $allNumberOfResults = $this->getAllAvailableNumberOfResultsOptions();  
    $this->view->assign('allNumberOfResults', $allNumberOfResults);  
    $allGroups = $this->getAllAvailableGroupOptions();  
    $this->view->assign('allGroups', $allGroups);  
}
```

Maybe a protected "helper" could solve the problem for both actions, but I'm not in deep into the code and I don't find any hint oder issue addressing this problem - so it's a bug or something I configure in a wrong way ...?

Greetings,
André
