Description			
<ul style="list-style-type: none">• 6.2.9• Workspace• Page was copied (default language: german, translated to: english) The following problem appears in the Workspace after copying the page and after publishing the changes to the LIVE-Workspace:<ul style="list-style-type: none">- The translated content elements on the copied page are shown in the Page-View of the Backend, which is correct. BUT- Frontend: Translated english elements aren't displayed- Backend: The List-View tells me, that the content elements aren't localized yet.			
If I now localize these elements, they are displayed in the Frontend but are shown twice in the Backend (Page-View).

#1 - 2015-10-30 16:23 - Oliver Hader

- Description updated

- Status changed from New to Needs Feedback

I guess this has been fixed with [#61179](#) (available in Git versions only at the moment). Please give feedback, whether the behavior still exists. Thanks!
