Description

Hi,

I was lacking the function of creating a reset button in my fluid template so I made a viewHelper for this purpose and attached it here. Please give me feedback whether it's useful or not :)

Regards,

Søren

History

- Assignee set to Sebastian Kurfuerst

- Target version deleted (1.0)

Hope you are enjoying the T3BOARD tour :-)

Any thoughts on this one? (sorry for assigning, but I'm not aware if a info mail is sent as long as no person is assigned)

#2 - 2010-03-15 16:49 - Sebastian Kurfuerst

- Status changed from New to Accepted

- Priority changed from Should have to Must have

#3 - 2010-03-18 15:44 - Sebastian Kurfuerst

That looks good, thanks very much :-) Have you already signed the Contributor License Agreement for TYPO3?

More info about the CLA can be found at <http://typo3.org/about/licenses/>

Thanks and greets :-)

Sebastian

#4 - 2010-03-23 16:14 - Soren Malling

No, haven't signed anything.

The patch was made during working hours, so it's my working email that are written in the feature so I need to get the corporation license signed. Normally i use my private email so the personal will be signed at the same time.

Hope to get back soon with it all signed :-)

Søren

CLA signed and send to the association this very day.

The owner of the source code is me as a individual, but "signed" with my e-mail at work. If you would like me to change this e-mail address to fit the signed CLA please tell me so and I will of course do that :-)

#6 - 2010-05-05 11:19 - Soren Malling

CLA accepted :-)

#7 - 2010-05-05 11:20 - Sebastian Kurfuerst

- % Done changed from 100 to 90

Thanks a bunch! I'll take care of committing.

Greetings,
Sebastian

Sorry for interfering.. But I'm asking myself: Why would you need a ViewHelper for this?
Instead of

```
<f:form.reset value="Reset Fields" />
```

you could just write

```
<input type="reset" />
```

in your Fluid template directly.. Or am I missing something?

BTW: There's a typo in the second example in the Class DocComment

My wish for a reset button came after a "experience" where i was using f:form.submit and expected f:form.reset to be a available button as well, as it's a commonly used button for forms.

#10 - 2011-05-06 10:09 - Sebastian Kurfuerst

- Parent task set to #26658

#11 - 2011-07-19 23:34 - Stefan Neufeind

@Sebastian/Bastian: Please make up your mind about this one.

#12 - 2011-09-09 15:20 - Robert Lemke

- Target version changed from 1.0 beta 2 to 1.0.0

#13 - 2011-09-30 12:27 - Robert Lemke

- Status changed from Accepted to Closed

- Target version deleted (1.0.0)

- Has patch set to No

I'll close this issue for the following reasons:

- as Bastian pointed out, not using a view helper is even more simple
- resetting forms is ... very unnecessary in most cases, actually not good UX practice anyways
